

INNOVA^{mee}

CONNECTOR SAP

Signaturit

Signaturit SAP Connector

"Integrate Signaturit in your SAP ERP to speed up document and contract signing processes with a legal solution."

INNOVATION

Signing documents on paper is part of the past. By digitizing the signature processes, you give a signal to your employees as well as to your clients and suppliers, as a company of the future.

COSTS

All the elements associated with the signing of documents such as time, paper, sending documents, equals cost savings. By introducing the electronic signature, you will reduce all associated costs and reduce operational costs.

TIME

With the electronic signature you will be able to reduce the signature processes of your company, facilitating the closing of agreements and remote contracts.

ENVIRONMENT

Improve your position in CSR by reducing paper. It is everyone's job to move towards a digital office by reducing the impact we make on the environment.

Different versions depending on your needs

We have versions adapted to your requirements so that the integration is according to your needs. Below you can see the characteristics of each modality:

	STANDARD	EXTENDED
Manual signature of own PDFs	X	X
Track Monitor	X	X
Signature management & reprocessing monitor	X	X
User role management	X	X
Massive Signature		X
Manual signature of PDFs generated in SAP		X
Automatic signature of PDFs generated in SAP		X
	3.500€*	8.500€*

• VAT not included.

Signaturit SAP Connector

Examples

- Using the **standard** option, you can sign a contract with a client, where you upload the PDF and sign without having to enter the SIGNATURIT platform.
- The **extended** option is useful to automate the signing of documents (for example, SEPA, among other documents). You automate the sending of forms from SAP and if necessary later, you can manage/re-send any document again from the monitor.

Services included

Setup and commissioning

The solution configuration in the extended model **includes telephone and remote support** during the start-up process. Preferably through our **Jira issue management tool**. We also have a **face-to-face service adapted to the needs of the company**.

Among the **main functions** that our technical advisors will perform, we can highlight:

- **Consultancy:** Prior to the installation of the solution, a consultancy will be carried out to learn about the company's SAP system and explain how the solution works.
- **Implementation:** An expert consultant in SAP will carry out the tasks of implementing the solution in the ERP.
- **Configuration:** the configuration of the solution will be carried out by INNOVamee personnel specialized in SAP solutions.
- **Robustness of the solution:** once the start-up is done, an analysis will be carried out to guarantee the correct configuration of the solution.
- **Training:** the solution includes 1 hour of training for Key-Users of the Signaturit tool.

About us

INNOVamee was born with the aim of accompanying companies in innovation, transformation and digital management.

Companies must be efficient and focus on their business. To do this, they have to rely on experts who provide value-added solutions in complementary skills. INNOVamee offers all the digital services that a company may need. We are a comprehensive digital and innovation provider.

More than 10 years of experience in the technology consulting sector, both at the client and service provider level, has led us to have a personalized treatment with our clients that is unique in the sector. We manage the digital transformation of companies in a trusted environment focused on the customer experience.

We provide essential and competitive services. We have the necessary infrastructure to carry out most of our work remotely, thus reducing the cost for the client.

As a global digital and innovation provider, we are qualified experts, who constantly work on learning, to offer a value-added service for companies. We have a wide range of services, from digital transformation projects to maintenance of configured systems with the best options offered by the technology market.

If you delegate all this responsibility to us, we assure you that you will be able to focus on what is most important: your work.

Taking into account the particularities of each business, we can adjust our service delivery schedule to the less critical time slots. Obtaining a quick response in the event of incidents is one of our main objectives.
